Introduction

The PL-2303 USB to Serial adapter is your smart and convenient accessory for connecting RS-232 serial devices to your USB-equipped Windows host computer. It provides a bridge connection with a standard DB 9-pin male serial port connector in one end and a standard Type-A USB plug connector on the other end. You simply attach the serial device onto the serial port of the cable and plug the USB connector into your PC USB port. It allows a simple and easy way of adding serial connections to your PC without having to go thru inserting a serial card and traditional port configuration.

This USB to Serial adapter is ideal for connecting modems, cellular phones, PDAs, digital cameras, card readers and other serial devices to your computer. And since USB does not require any IRQ resource, more devices can be attached to the system without the previous hassles of device and resource conflicts.

Finally, the PL-2303 USB to Serial adapter is a fully USB Specification compliant device and therefore supports advanced power management such as suspend and resume operations as well as remote wakeup. The PL-2303 USB Serial cable adapter is designed to work on all Windows operating systems.

Features & Specifications

- ✓ Smart USB to RS-232 (DB 9-pin male serial port) interface
- ✓ Supports various serial devices like modems, PDAs, cellular phones, digital cameras, card readers, and more.
- ✓ Easy Plug and Play Installation
- ✓ Full Compliance with the Universal Serial Bus Specification v1.1
- ✓ Supports the standard RS-232 Serial Interface
- ✓ Supports automatic handshake mode
- ✓ Supports Remote Wake-up and Intelligent Power Management
- ✓ Provides Dual Buffers for upstream and downstream data transfer
- ✓ No IRQ resource required
- ✓ Bus Powered – no separate power supply or battery required

System Requirements

- ✓ Windows 2000, Windows XP, Windows Vista, or Windows 7 operating system
- ✓ AMD or Intel Pentium 133MHz or better based computer
- ✓ USB 1.1 or higher port
- ✓ USB-to-Serial Cable Adapter
- ✓ USB-to-Serial Driver Installer Program

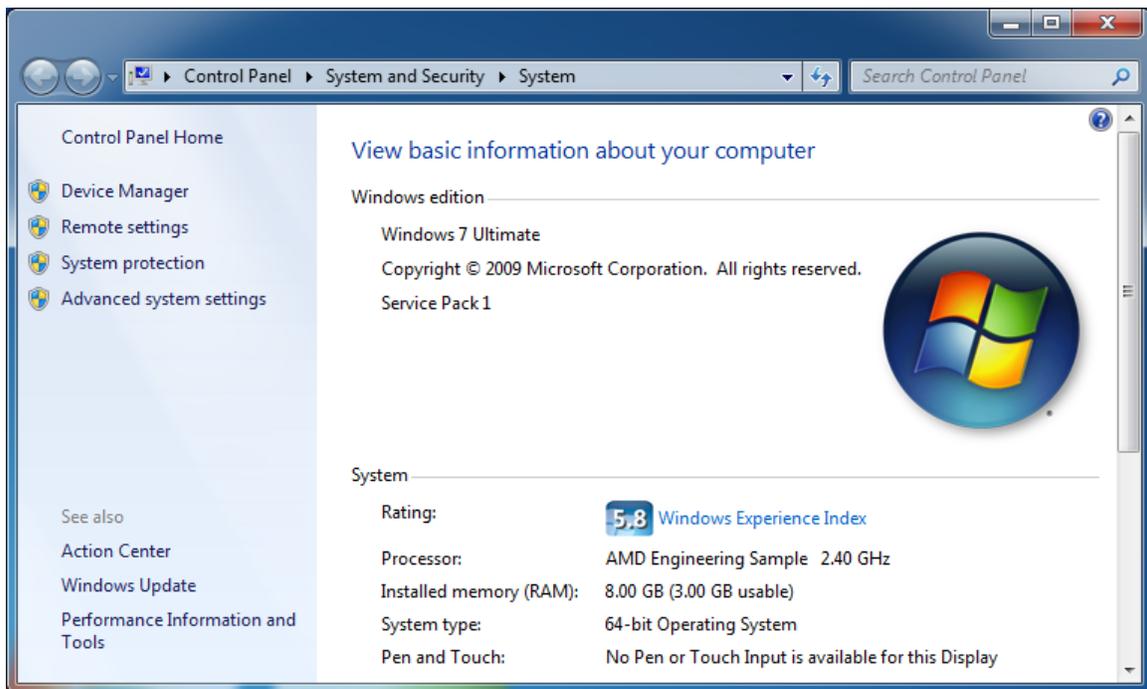

Installing the Device with InstallShield

This section will guide you on how to install the PL-2303 USB to Serial adapter under Windows 7, Windows Vista, Windows XP, and Windows 2000 operating systems. You can download the latest Driver Installer program from Prolific support website.

Note:

Please take notice of the installation order. First, run the Driver Installer Program before plugging in the USB to Serial adapter. If you already plug the device during the driver installation, you need to replug the device again for Windows to enumerate the device and load the drivers installed.

The following steps will show how to install the device under Windows 7 Ultimate SP1 (64-bit) OS. Basically, the procedures are somewhat the same for all Windows operating systems versions.

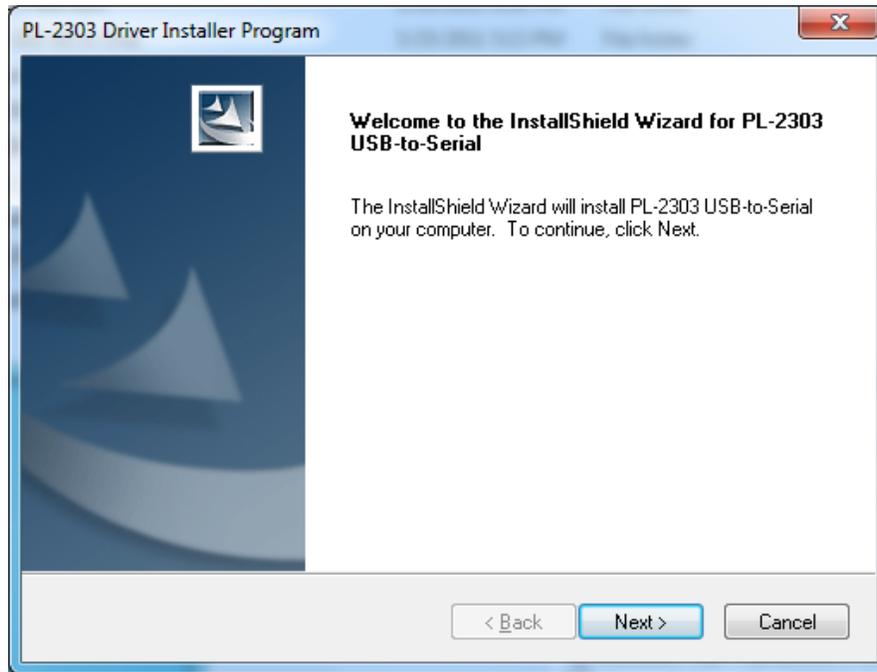

PL-2303 USB to Serial Adapter Installation Manual

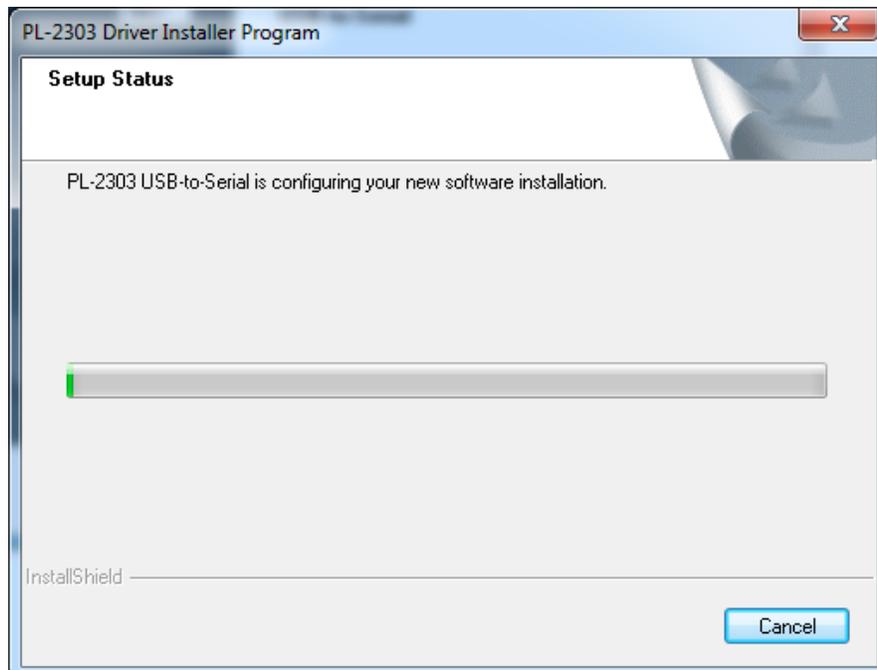

1. Power on your computer and boot to Windows. Run or double-click the PL-2303 Driver Installer program.

 PL2303_Prolific_DriverInstaller_v1417.exe

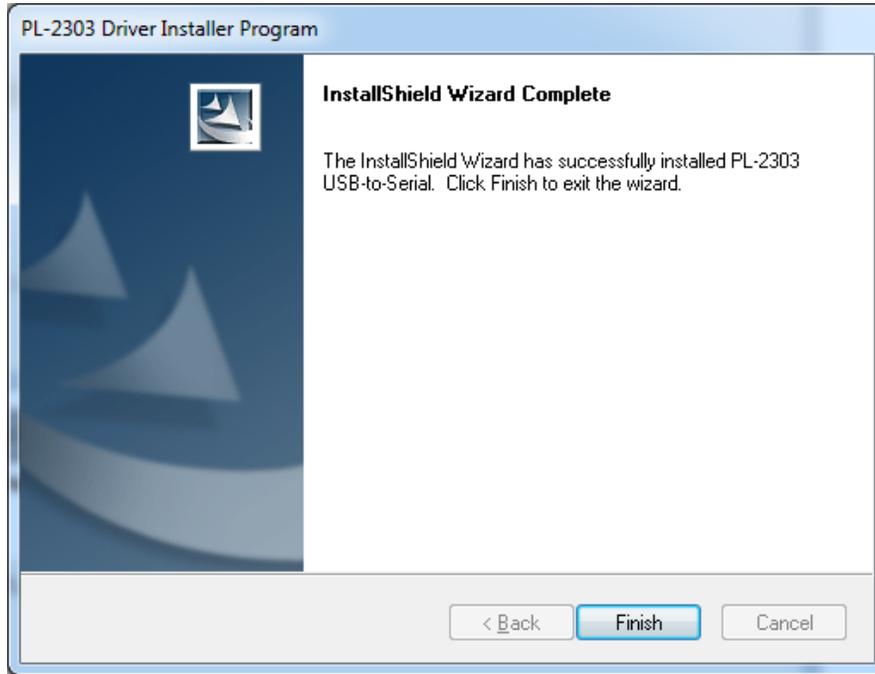

2. The InstallShield Wizard will be displayed on your screen to inform you that the PL-2303 USB-to-Serial driver will be installed on your computer. Click **Next** to continue.

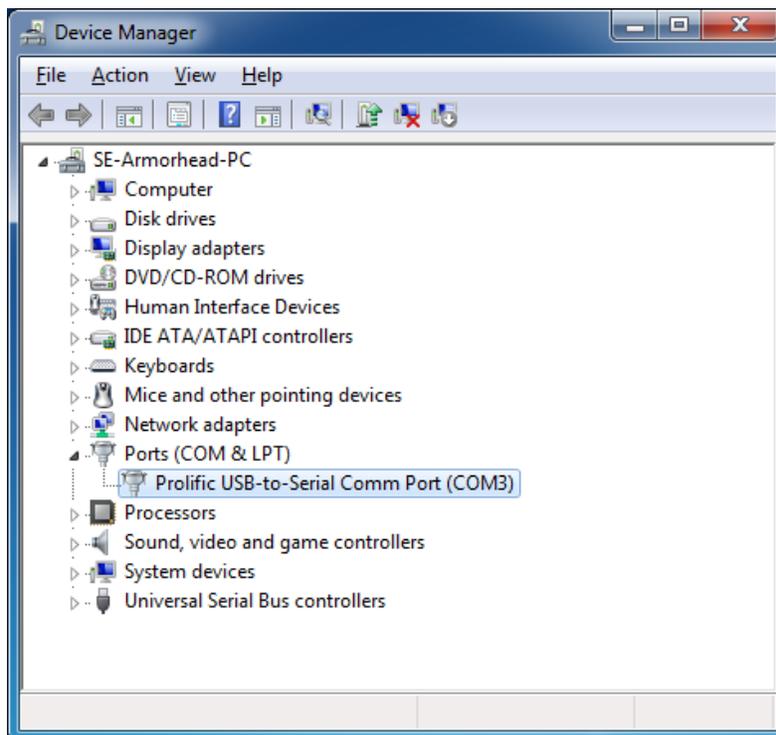

3. The PL-2303 Driver Installer program will then start to install the drivers needed.

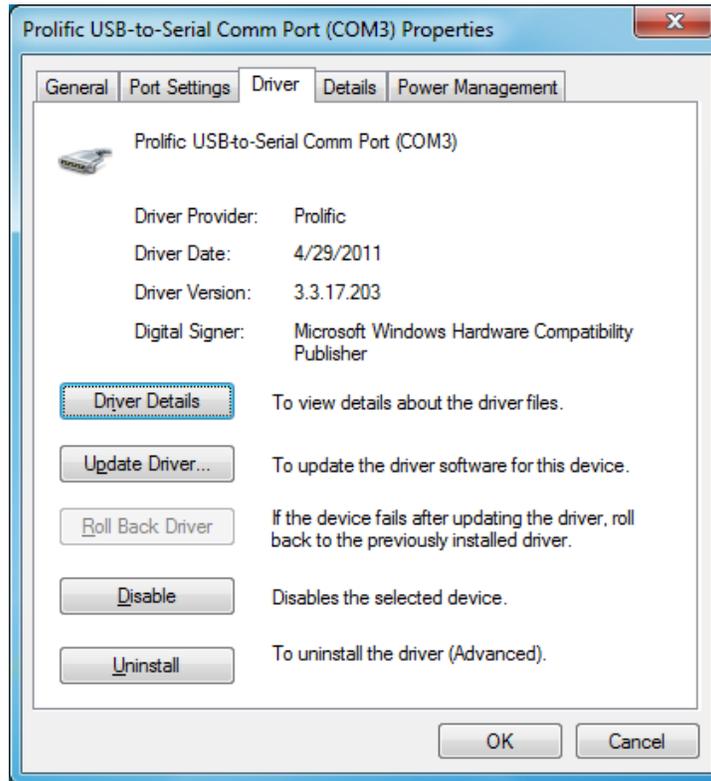

- Click the **Finish** button to close the InstallShield program. If you have plugged the cable into the PC while running the setup installation, please unplug and replug the cable for the system to detect the device.

- Plug in the USB to Serial adapter to the PC USB port. Windows should detect the driver as **Prolific USB-to-Serial Comm Port**. Go to Device Manager and check for the "**Prolific USB-to-Serial Comm Port**" device and the COM port number assigned by Windows.

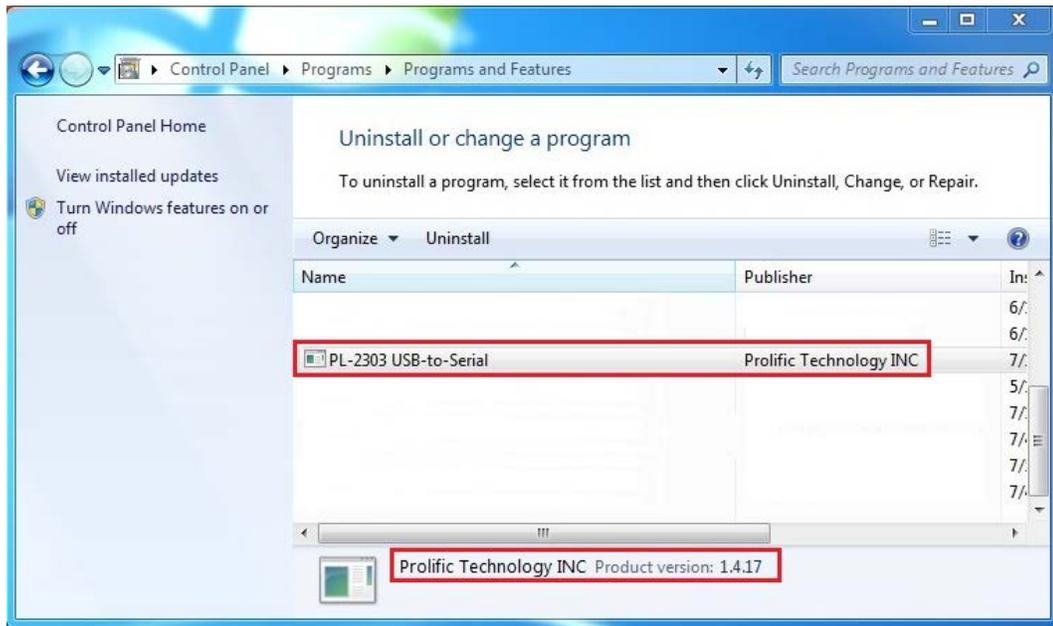

6. You can also check the driver version by right-clicking on the “**Prolific USB-to-Serial Comm Port**” device and select Properties and Driver tab.

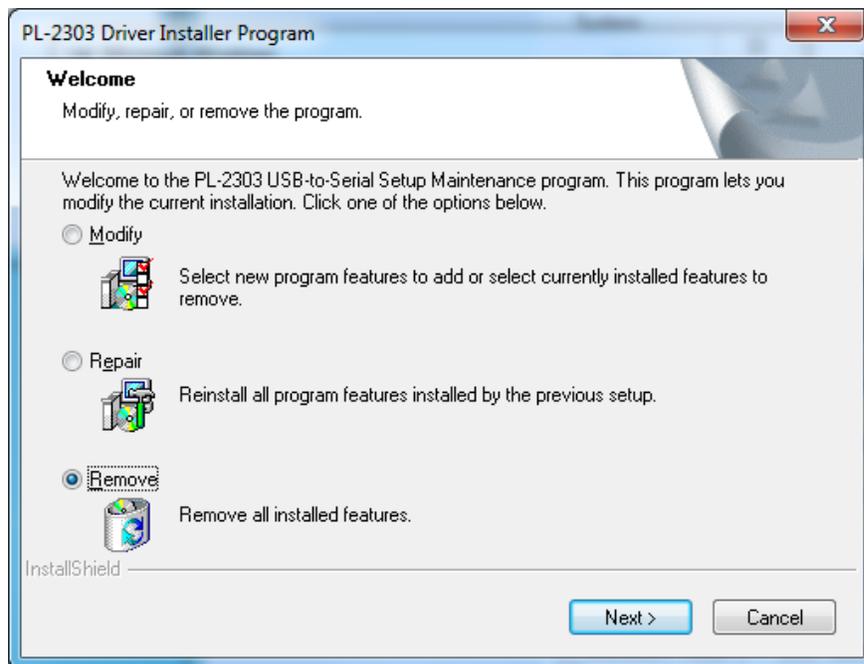

Uninstalling the Device Driver

To uninstall the PL-2303 driver, follow the below steps:

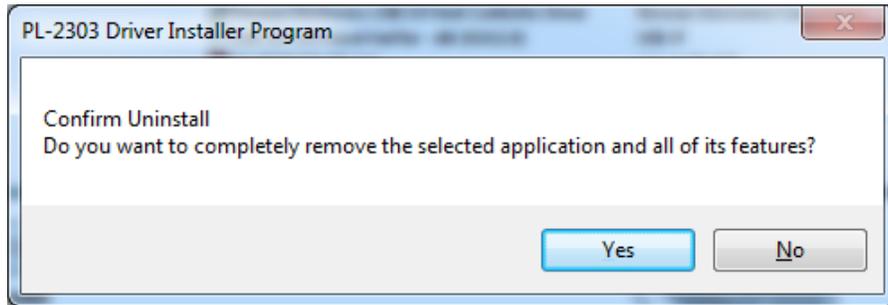

1. Click Start – Control Panel – Uninstall a Program (Add or Remove Programs). Look for the “PL-2303 USB-to-Serial” program and click the Uninstall (Remove) button.

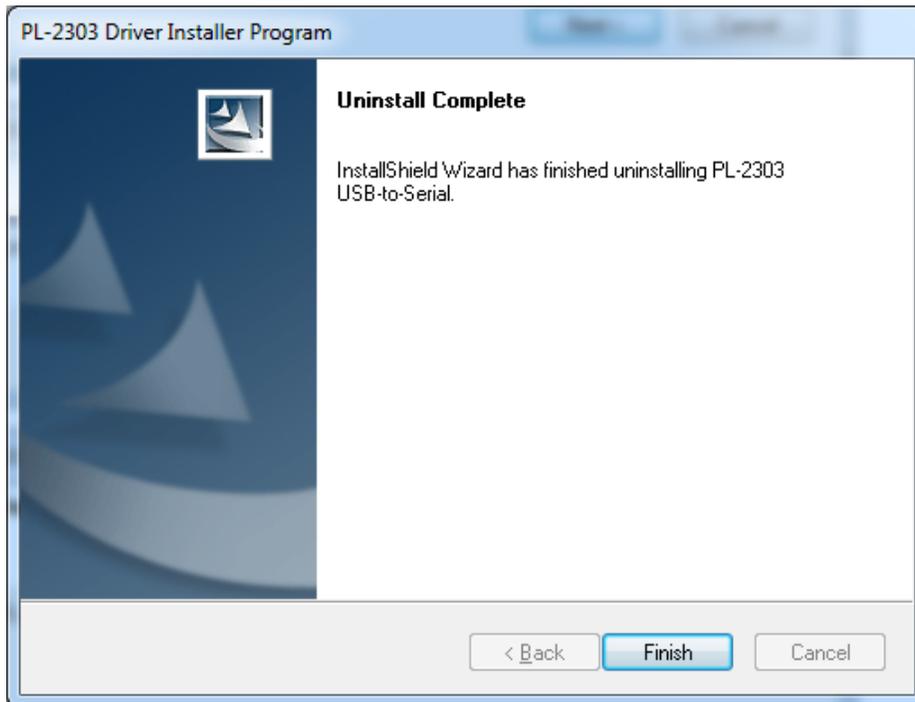

2. InstallShield Wizard will then start the maintenance program and will prompt you to choose if you want to modify, repair, or remove the driver. Click the Remove button and click Next to begin the driver uninstall.

3. The InstallShield Wizard will prompt you to confirm to uninstall. Click Yes to continue.

4. Wait for the InstallShield Wizard to complete the uninstall process. When complete, click Finish to end the program. Wait for some few seconds until the "PL-2303 USB-to-Serial" program is removed from the Control Panel Uninstall (Add or Remove Programs) program list.
